To-Do List in React (Front end Only)

A simple to-do list application written in javascript.

Features:-

- **Add Tasks**: Quickly add tasks to your to-do list.
- **View Tasks**: Display all your tasks with their status.
- **Mark as Completed**: Mark any task as completed once you're done.
- **Remove Task**: Remove tasks that are no longer needed.
- **Task Properties**: Each task has a title and a status (Incomplete/Complete)

Prerequisites:-
- Npm

Running the Application:-
- Navigate to the directory containing the script.
- Run the code using the following command:

> npm run start

Usage:-

Upon running the code, you'll be presented with an option to add the tasks. As they are added, they'll be displayed on the screen along with buttons to mark it as complete and to remove it.

Data Structures:-
- Lists

Tech Stack:-
- React
